Diamorph  
Group

The science of protection.

We are Diamorph

# Advanced Material solutions for extremely demanding industrial applications and environments.

## A materials science based company

We use our deep advanced material knowledge to develop solutions giving peace of mind across a diverse range of industries.

The Diamorph Group consists of brands that are well known for their material science innovation and proven performance in arduous real-life situations, as well as in-house manufacturing and R&D.

Diamorph actively seeks deep niches in larger markets where we can use our **advanced materials knowledge, technological innovations and science** to create differentiated products with extreme performance.

Every single day our scientists are continuously improving our materials for even better performance.

Diamorph is a materials science based company. We use our deep materials science knowledge in our chosen technologies, to make products that provide protection in a wide range of safety critical or high cost of failure activities.

# Protecting your people, assets and processes for over 100 years.

## Our family of brands
